MHF4 Pigtail Cable Assembly

General information

MHF4 (UMCC gen 4) micro coaxial pigtail cable assembly stripped.

Typical applications

High-frequency signal transmission in compact and complex electronic environments where miniaturized RF connections are essential. Commonly used in wireless and IoT devices, these cable assemblies facilitate antenna connections for Wi-Fi, Bluetooth, LTE, and 5G modules, as well as enable interoperability between different connector standards.

Electrical data

1st Connector	MHF4 Plug, Right Angle
1st Contact gender	female
1st Connector mounting type	free hanging (In-Line), right angle
2nd Connector	NA
2nd Contact gender	NA
2nd Connector mounting type	NA
Cable impedance [Ohm]	50
Maximal frequency [GHz]	6

Mechanical data

Length [mm] [1)]	40 +/- 1
Outer Diameter [mm]	0.81
Color [2)]	Black
Other characteristics	At the open end, the outer insulation and the outer conductor are removed over a length of 10 mm. Further details are provided in the drawing on the following page.

Environmental data

Operating temperature [ºC]	-40…+85
Storage temperature [ºC]	-40…+85
Ambient relative humidity [%]	0…85
RoHS / REACH compliant	yes / yes

Additional information

[1)] The cable length can be customized as per requirements.

[2)] Other color option available upon request.

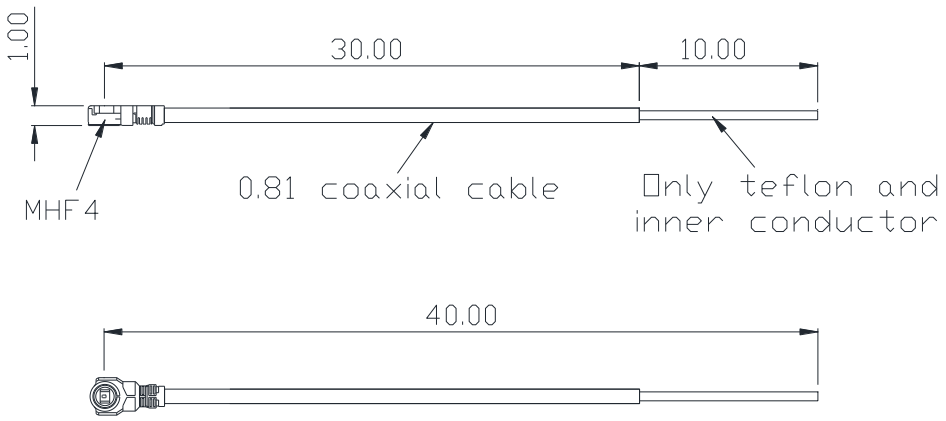
MHF4 Pigtail Cable Assembly

Drawings



All dimensions are in mm

Cable attenuation per unit length

Frequency [GHz]	Attenuation [dB/m]
0.1	-0.96
1	-2.96
2	-4.39
3	-5.56
4	-6.62
5	-7.54
6	-7.88
